

CONTENTS OF AGRICULTURAL AND FOREST METEOROLOGY, VOLUME 51

VOL. 51 NO. 1

JUNE 1st 1990

Research Papers

- TLM: a technique with application in the numerical solution of diffusion problems
N.M.J. Crout, K. Gregson and M.H. Unsworth (Loughborough, U.K.) 1
- Remote estimation of leaf transpiration rate and stomatal resistance based on infrared
thermometry
Y. Inoue, B.A. Kimball, R.D. Jackson, P.J. Pinter Jr., and R.J. Reginato (Phoenix, AZ,
U.S.A.) 21
- The estimation of transpiration from sparse dryland millet using stomatal conductance
and vegetation area indices
J.S. Wallace, J.M. Roberts (Wallingford, U.K.) and M.V.K. Sivakumar
(Niamey, Niger) 35
- Modelling the effect of condensation on the moisture content of forest litter
N.R. Viney and T.J. Hatton (Canberra, A.C.T., Australia) 51
- Estimation of transpiration by single trees: comparison of a ventilated chamber, leaf
energy budgets and a combination equation
R. Leuning (Canberra, A.C.T., Australia) and I.J. Foster (Wembley, W.A., Australia) . 63

Short Communication

- An accurate solution to the Penman equation
A.J. McArthur (Loughborough, U.K.) 87

VOL. 51 NO. 2

JUNE 15th 1990

Research Papers

- Plant architectural parameters of a greenhouse cucumber row crop
X. Yang, T.H. Short, R.D. Fox and W.L. Bauerle (Wooster, OH, U.S.A.) 93
- Stomatal conductance of some grapevines growing in the field under a Mediterranean
environment
T. Winkel and S. Rambal (Montpellier, France) 107
- Low-frequency wind fluctuations within an irregular forest
D.G. Yerg (Houghton, MI, U.S.A.) 123
- Estimating maximum droplet wetness duration on crops from nearby weather station data
Y. Zhang and T.J. Gillespie (Guelph, Ont., Canada) 145
- An approximate analytical theory to predict the diurnal effects of local advection
M.D. Novak (Vancouver, B.C., Canada) 159
- Comparative statistical validation of two ten-day water-use models and of three yield-
reduction hypotheses for yield assessment in Botswana
P. Vossen (Gent, Belgium) 177

- Announcement* 196

Research Papers

- Transpiration, leaf temperature and stomatal resistance of a greenhouse cucumber crop
X. Yang, T.H. Short, R.D. Fox and W.L. Bauerle (Wooster, OH, U.S.A.) 197
- Bellani evaporation variation in hill-land pasture
C.M. Feldhake and D.G. Boyer (Beckley, WV, U.S.A.) 211
- Estimating evaporation from pasture using infrared thermometry: evaluation of a one-layer resistance model
J.D. Kalma and D.L.B. Jupp (Canberra, A.C.T., Australia) 223
- Prediction of solar radiation from rainday information using regionally stable coefficients
M.R. McCaskill (Townsville, Qld., Australia) 247
- Description and validation of an array model - MAESTRO
Y.P. Wang and P.G. Jarvis (Edinburgh, U.K.) 257
- Leaf wetness duration in a field bean canopy
L. Huber and B. Itier (Thiverval-Grignon, France) 281
- Radiation utilization efficiency and the growth of soybeans exposed to ozone: a comparative analysis
P.W. Leadley, J.F. Reynolds, R. Flagler and A.S. Heagle (Raleigh, NC, U.S.A.) 293
- Vapour flux density and transpiration rate comparisons in a stand of Maritime pine (*Pinus pinaster* Ait.) in Les Landes forest
A. Granier (Seichamps, France), V. Bobay (Orsay, France), J.H.C. Gash (Wallingford, U.K.), J. Gelpe (Cestas, France), B. Saugier (Orsay, France) and W.J. Shuttleworth (Wallingford, U.K.) 309
- Exploiting rainy season potential from the onset of rains in the Sahelian zone of West Africa
M.V.K. Sivakumar (Niamey, Niger) 321
- A climatic classification of plant hardiness in the United States and Canada
A.T. DeGaetano and M.D. Shulman (New Brunswick, NJ, U.S.A.) 333
